The image shows a Windows 10 desktop environment. In the foreground, a Google Chrome browser window is open, displaying the Google search homepage. The search bar contains the text "Buscar en Google o escribir una URL". Below the search bar, there are several search suggestions, including "https://servici...", "NetIQ Access ...", "Activacion", and "URL no permi...". A "Personalizar" button is visible in the bottom right corner of the search page.

Overlaid on the left side of the browser window is the Windows Start menu. The search bar at the top of the Start menu contains the text "java". The search results are categorized into "Mejor coincidencia" (Best match), "Comando" (Command), "Aplicaciones" (Applications), "Sitios web" (Websites), and "Buscar en Internet" (Search on the Internet). The "Mejor coincidencia" section highlights the application "Configurar Java" (Configure Java) with a blue background. Below it, the "Comando" section lists "java". The "Aplicaciones" section lists "JavaSetup8u211.exe", "Acerca de Java", "JavaSetup8u211 (3).exe", and "Comprobar Actualizaciones". The "Sitios web" section lists "Visite Java.com". The "Buscar en Internet" section lists "java - Ver resultados web", "java download", and "java policy".

The Windows taskbar is visible at the bottom of the screen, showing various application icons and the system tray with the date and time (11:37 a. m., 16/08/2019).

Se abrirá la ventana *Configuración de Archivos Temporales* donde se dará clic en el botón *Suprimir Archivos*.
